Dear Anthony:

Our school enjoyed participating in the **United in Service Day** event you put together. Our students expressed enthusiasm and enjoyed hearing you speak. You were one of the most entertaining and informative speakers they have had the pleasure of hearing. All of our students that participated in this event and heard your talk, asked about hearing you speak again. We especially enjoyed how you were able to get the audience involved and the students from various backgrounds to work together toward common goals and good.

We highly recommend you. Your philosophy and approach can make a huge difference in many lives. You talk about things that people need to hear. Our students will be better equipped to communicate and work together with people of different religions and ethnic backgrounds because of your efforts. Your lectures should be taught at every school-from grade school through college.

Regards,

Nehad Ahmed

Principal

Orange Crescent School
